Sean Gulliver P. Doctora

AI-Native Full-Stack Engineer

0976-334-1944 • seangulliverdoctora@gmail.com

PROFESSIONAL SUMMARY

AI-native engineer who uses AI across the entire development workflow — coding, debugging, code review, and delivery — with Claude Code, Codex, and agent skills. Builds end-to-end products with Laravel, ASP.NET Core, FastAPI, NextJS, Flutter, and PostgreSQL, from database design and RESTful APIs to Dockerized cloud deployment. Takes ownership of complex features in fast-paced startup environments.

EDUCATION

Bachelor of Science in Information Technology *2022 – 2026*
Saint Vincent College of Cabuyao

TECHNICAL SKILLS

Mobile: Flutter · Bloc · MVVM · Retrofit · Dio · React Native (Expo)

Web: Vue · NextJS · TypeScript · Tailwind · TanStack · Filament · Livewire

Backend: Laravel · ASP.NET Core · Python · FastAPI

Databases: PostgreSQL · PostGIS · MySQL

Cloud: Docker · AWS · Cloudflare · Hostinger · Coolify

Tools: GitLab · GitHub · Claude Code · Codex · AI Agent Skills

WORK EXPERIENCE

Junior Software Engineer (AI-Native) | **Firefly Electric & Lighting Corp** *Jul 2026 – Present*

- Design and build internal company systems end to end with Laravel and Vue, owning features from requirements to release.
- Develop Python and FastAPI services that power internal tools, exposing clean, well-structured APIs for the web applications to consume.
- Operate as an AI-native engineer across the full lifecycle — scaffolding, implementation, debugging, refactoring, and code review — using Claude Code, Codex, and agent skills to ship faster without sacrificing quality.

Tech Stack: Laravel, Vue, Python, FastAPI, Claude Code, Codex

Full-Stack Software Engineer | **ePickMeUp Inc** *Apr 2025 – Nov 2025*

- Led end-to-end web development using Laravel and Filament, owning full feature delivery from design to deployment.
- Participated in Flutter cross-platform mobile development, contributing to UI, state management, and API integration.
- Conducted code reviews and SQL query optimization to improve performance and maintainability.
- Managed production server infrastructure using NGINX, Cron, Supervisor, PostgreSQL, and PostGIS for geospatial data handling.
- Collaborated with the CTO on architecture design and sprint planning for upcoming development phases.

Tech Stack: Laravel, Filament, Livewire, Flutter, PostgreSQL, PostGIS, Docker, AWS, GitHub

Junior Full-Stack Trainee | **ePickMeUp Inc** *Jan 2025 – Apr 2025*

- Contributed to application architecture design and participated in web development using Laravel and Filament.
- Assisted in QA testing and contributed to system documentation.

Tech Stack: Laravel, Filament, Livewire, Bootstrap, jQuery, JavaScript

PROJECT EXPERIENCE

ePickMeUp Ride-Hailing Application — *Full-Stack Developer*

- Delivered a complete role-based web application (Admin, Operator, Driver, Customer) with secure authentication and efficient workflows.
- Designed and developed RESTful APIs consumed by the Flutter mobile app, ensuring high performance and clean architecture.
- Architected and optimized the database — data modeling, relational design, indexing, and performance tuning for production.
- Integrated PayMongo for driver Transactions, supporting bulk disbursements with an SMS-based authorization approval workflow.

Tech Stack: Laravel, Flutter, PostgreSQL, PostGIS, Docker, AWS, GitHub

ePickMeUp On-Demand Delivery — *Full-Stack Developer*

- Built an on-demand delivery platform with real-time order and driver tracking, including shareable tracking links for customers.
- Managed and developed the Admin Side of the platform, overseeing system operations, user management, and platform configuration.
- Integrated PayMongo for driver Transactions, supporting bulk disbursements with an SMS-based authorization approval workflow.
- Implemented a live ticketing and chat support system using WebSockets for real-time communication.

Tech Stack: Laravel, Filament, Livewire, Tailwind, Flutter, PostgreSQL, PostGIS, Docker, GitHub

PharmaDepot — Pharmaceutical E-Commerce — *Full-Stack Developer*

- Contributed to a pharmaceutical e-commerce platform enabling seamless online ordering and on-demand medicine delivery.
- Worked with a modern stack including ReactJS, TypeScript, TanStack, and Shadcn on the frontend, backed by a secure cloud infrastructure.

Tech Stack: Laravel, ReactJS, TypeScript, TanStack, Shadcn, Tailwind, PostgreSQL, PostGIS, AWS (EC2, S3, RDS, ELB, CloudFront, Secrets Manager), Cloudflare

ePickMeUp Information Management System — *Lead Developer*

- Developed an internal system to monitor TNVS applicant status with automated email and SMS notification workflows.
- Architected and optimized the database — data modeling, relational design, indexing, and performance tuning for production.

Tech Stack: Laravel, Filament, Livewire, PostgreSQL
