WORK EXPERIENCE

ePickMeUp Inc

Junior Full-stack Trainee

Jan 2025 – April 2025

- Participate in designing application architectures and structures.
- Lead web development with Laravel and Filament.
- Plan and coordinate upcoming development phases with CTO.
- Contributed to the documentation of system features and functionality.
- Participate in quality assurance (QA) testing.
- Assisted clients in using the system and provided user training.
- Tech Stack: Laravel, PHP, Filament, Livewire, HTML, CSS, Bootstrap, JQuery, JavaScript, Postgres, GIT, Github, Docker, AWS Services.

Full Stack Software Engineer

April 2025 – Nov 2025

- Participate in designing application architectures and structures.
- Participate in cross-platform development with Flutter.
- Lead web development with Laravel and Filament.
- Participate in code reviews and query optimization.
- Plan and coordinate upcoming development phases with CTO.
- Server experience with NGINX, Ubuntu, PHP-FPM, Cron, Supervisor, PostgreSQL, and PostGIS for indexing and querying geospatial data.
- Tech Stack: Laravel, PHP, Filament, Livewire, HTML, CSS, Bootstrap, JQuery, JavaScript, Flutter, Postgres, GIT, Github, Docker, AWS Services.

PROJECT EXPERIENCE

ePickMeUp Ride-Hailing Application

Junior Full-stack Developer

- Led the end-to-end development of the Web Application, delivering complete role-based systems for Admin, Operator, Driver, and Customer with secure authentication and efficient workflows.
- Designed and developed RESTful APIs consumed by the Flutter mobile application, ensuring high performance, scalability, and clean architecture.
- Architected and optimized the database, including data modeling, relational structure design, indexing strategies, and performance tuning for production workloads.
- Collaborated in building the Flutter Mobile Application, contributing to UI components, state management, API integration, and business logic.
- Containerized the entire application using Docker Compose, enabling consistent development environments and simplified deployment.
- Deployed and managed infrastructure on AWS, including EC2 hosting, RDS configuration, and S3 storage setup, ensuring security, reliability, and cost-efficient operations.
- Tech Stack: Laravel, HTML, CSS, JavaScript, Bootstrap, PostgreSQL, Flutter, PostGIS, Github, Docker.

PharmaDepot

Junior Full-stack Developer

- Contribute to pharmaceutical e-commerce initiatives, enabling seamless online ordering and on-demand delivery of medicines while ensuring compliance and customer convenience.
- Tech Stack: Laravel, Tailwind, ReactJS, TypeScript, TanStack, PostgreSQL, PostGIS, Shadcn, EC2, Secrets Manager, Elastic Load Balancer, Cloudfront, Cloudflare, S3, RDS.
